Cutimed® Siltec Sorbact®

Superior Fluid and Infection Management

Siltec Technology

+ DACC Technology

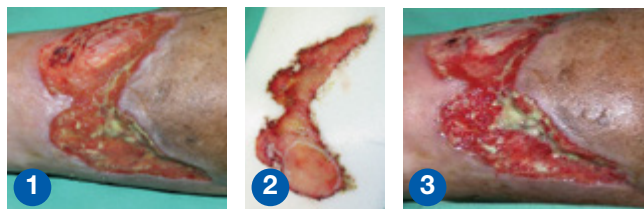

- Binds bacteria and renders them inert
- Smart Pore Structure allows vertical absorption of exudate
- Super absorbant particles lock in wound exudate reducing risk of maceration
- Effectively absorbs highly viscous exudate

Absorption that adapts + DACC Technology

Cutimed® Siltec Sorbact® is an innovative combination of reliable absorption and effective infection management. The super-absorbent particles within the foam layer effectively adjust to absorb moderate to high, viscous exudate and retain it even under compression. DACC Technology binds bacteria and renders it inert, versus killing like other silver and antimicrobials, which allows for natural wound healing.

Total Fluid Handling Capability

- Binds bacteria with DACC Technology as the wound contact layer
- Smart Pore Structure and super-absorbers ensure vertical absorption of exudate reducing the risk of maceration
- Dynamic MVTR allows fluid to transpire while also maintaining a moisture balance

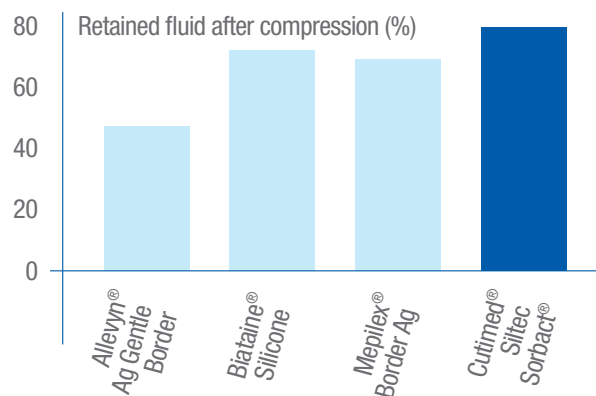

Picture 1 shows macerated edges before use

Picture 2 shows true vertical absorption

Picture 3 shows improvement of wound edges after 24 hours

Reliable Absorption – Even Under Pressure

Lab test: Cutimed® Siltec Sorbact® has the highest retention under compression of all tested products (2011, in-vitro, data on file)

Cutimed® Siltec Sorbact® Dressing*	Size	REF No.	Dressings/Box	Suggested HCPCS**
	3 x 3 in.	7992900	10	A6212
	5 x 5 in.	7992901	10	A6212
