

Heel Application Guide

- 1 Cleanse the wound/skin in accordance with local procedures. The peri-wound skin should be clean and dry to assist adhesion.
- 2 Select the appropriate size. For wounds, the dressing pad should overlap the wound by 3/4 inch. **Do not cut dressing to size.**
- 3 Remove one side of the release liner and apply the dressing to the skin or wound.
- 4 To assist adhesion, gently press the adhesive to the skin.
- 5 Smooth the dressing to facilitate good contact between the pad and the skin wound. Remove the remaining release liner.
- 6 Check the dressing at regular intervals and change according to the clinical condition of the wound, when saturated or per hospital protocol.

HEEL

KerraFoam®

Gentle Border

Designed for protection and exuding wounds, secured with a gentle silicone contact layer.

Order Information

Product Code	Size (pad size)	Dressings per box	HCPCS
CWL1010	3 x 3 in (2 x 2 in)	10	A6212
