KerraLite[®]

Cool

Soothing, debriding and
moisture-balancing dressings

Introducing KerraLite® Cool - the next-generation hydrogel dressing

Maintaining the correct balance of moisture is vital for effective wound healing.

KerraLite Cool is a **soothing, debriding and moisturizing dressing** that provides the ideal environment for managing lightly exuding sloughy wounds. KerraLite Cool is a **strong, transparent hydrogel** that is impermeable to external contaminants such as bacteria, but permeable to moisture.

Cool and soothing to the touch, KerraLite Cool does not dry out or stick to the underlying tissue on removal, reducing the risk of maceration. **It's one of the most easy-to-use, comfortable and cost-effective dressings you can choose.**

KerraLite® Cool dressings are designed to:

- Help to improve healing of lightly exuding wounds
- Clean the wound, debriding necrotic tissue
- Increase granulation tissue of chronic wounds
- Soothe and cool to minimize discomfort
- Protect against wound dehydration
- Barrier to the growth of bacteria
- Help prevent maceration of the peri-wound area
- Can be cut to fit most wounds (non-adhesive only)

Soothing, debriding and moisture-balancing dressings

KerraLite Cool

- ① Fluid-repellent, flexible and highly breathable polyurethane film layer
- ② Pro-ionic[®] hydrogel contact layer designed to enhance interactions with fluids and increase wear time
- ③ Also available with an adhesive border to help secure the dressing in place - **KerraLite Cool Border**

KerraLite Cool Border

Clinically proven to reduce MMPs and wound pain

Various studies have shown **hydrogel dressings have the ability to inhibit proteolysis**, resulting in **consistent reductions in MMPs and wound pain**.¹

A subsequent evaluation² was conducted using 11 participants (8 females, 3 males) at The Wound Healing Research Unit, Cardiff University, UK.

Despite undergoing *up to 2 years of wound management with other dressings*, **all patients showed a significant improvement in terms of reduction of slough and increase in granulation tissue within just 14 days of using KerraLite Cool.**

A typical example from the study is shown here¹:

Day 0: pre-treatment

Day 14: post-treatment

Order Information

Product Code	Size	Dressings per box	HCPCS
Non-adhesive			
CWL1004	2.4 x 2.4 in	5	A6234
CWL1005	5 x 3.5 in	5	A6235
CWL1006	7 x 5 in	5	A6235
Adhesive Border			
CWL1007	3 x 3 in	5	A6237
CWL1008	4 x 4 in	5	A6237
CWL1009	6 x 6 in	5	A6238
