SOMEDAY, WOUND CARE WILL CHANGE FOREVER.

SOMEDAY HAS ARRIVED.

PRESENTING NEUTROPHASE WITH NEUTROX™: A proprietary, FDA cleared, 510(k) skin and wound cleanser made from pure 0.03% hypochlorous acid (HOCl) in saline. Countless research articles have shown that hypochlorous acid (HOCl) in solution is effective against a broad spectrum of microorganisms. In-vitro studies have shown the solution disrupts biofilm and eliminates 99.99% of pathogens in less than a minute.

Until now, short shelf life and impure formulations prevented HOCl from being widely used. A total game-changer in wound care, NeutroPhase is the only product available that contains pure, 36-month shelf-stable HOCl in solution. Its groundbreaking formula is the result of a highly controlled compounding process that does not contain cytotoxic sodium hypochlorite (bleach).

BOTTOM LINE? NeutroPhase eliminates the dilemma between clearing the wound of stifling microorganisms or protecting vulnerable new tissue. Not only do the in-vitro studies show the fast activity of NeutroPhase in solution, it also doesn't generate bacterial resistance. No known side effects or stinging have been reported with clinical use.

Bottle includes septum cap and built-in hanger (to aid in irrigation) and traditional trigger spray.

INDICATIONS FOR USE:

NeutroPhase® Skin and Wound Cleanser is intended for use under the supervision of healthcare professionals for cleansing and removal of foreign material, including: microorganisms and debris from wounds; cleaning minor cuts, minor burns, superficial abrasions, and minor irritations of the skin; as well as moistening absorbent wound dressings. It is also intended for moistening and debriding acute and chronic dermal lesions, such as: Stage I-IV pressure ulcers, stasis ulcers, leg ulcers, diabetic foot ulcers, post surgical wounds, first and second degree burns, as well as grafted and donor sites.

NeutroPhase passes USP <51>, which demonstrates rapid in-solution eradication of *P. aeruginosa*, *E. coli*, *S. aureus*, *C. albicans*, and *A. niger*.

Neutrox™ is a pure form of hypochlorous acid (HOCl) produced by NovaBay's proprietary and patented manufacturing process.

NeutroPhase is distributed in the U.S. by Principle Business Enterprises, Inc. (PBE), and is manufactured by NovaBay Pharmaceuticals, Inc.
